

Summary of Qualifications

* I'm a full-stack developer with over 3 years of experience in implementing software solutions for enterprise-level applications across mobile and web platforms. My focus lies in growing strong professional relationships, providing efficient results and having a passion for gaining knowledge in cutting-edge technologies.

Technical Skills

Languages: JavaScript, TypeScript

Web Technologies: NodeJS, AWS, Angular, HTML, CSS

Databases: Microsoft SQL Server, DynamoDB

Office Tools: Microsoft Office (Word, PowerPoint, Excel, Outlook), StarUML

Content Management Systems (CMS): WordPress

Professional Experience

Deloitte

Aug 2021-Present

Role: Full-stack Developer (Consultant)

Apr 2022-Present

Skills Used: Angular, NodeJS, AWS, GraphQL, JIRA

- * Work on AWS **lambdas**, **step functions**, **APIs (GraphQL)** and database (**DynamoDB**) to integrate the back-end of the application with multiple inbound and outbound systems using **NodeJS**.
- * Serve as the junior **lead** on the team, **review PRs** and help the team understand the requirements.
- * Consistently involved in **technical** and **functional** grooming of client's requirements and tasked with **mentoring** juniors on the team.
- * Briefly developed code on the front end using **Angular** (desktop web app using Electron) to integrate subscriptions and other functionalities.

Role: Frontend Developer (Analyst)

Aug 2021-Apr 2022

Skills Used: Angular, HTML, CSS, Typescript

- * Worked on a web application that is built on **Angular**, and is used to provide roadside assistance to people across the United States.
- * Played an active role in defining how the application looks as well as how it works.
- * Worked on the **translation** of design wireframes into actual code in an agile environment.
- * Created **user-centric** designs by understanding business requirements and user **feedback**.
- * **Collaborated** with engineering teams across the globe, to convert the requirements into meaningful customer experiences.

Brillio

Sep 2020-July 2021

Role: Software Engineer

Skills Used: NodeJS, Microsoft SQL Server, Angular, OAuth

- * Worked as a full-stack developer in the development of an in-house app and website, called OnTheGo.
- * The app facilitates several day-to-day tasks of employees, including but not limited to, leave submission, timesheet submission, etc.
- * Majorly worked on the server side of the project and built scalable and secure APIs for the frontend team.
- * Designed, integrated and maintained new functionalities of the app that aimed at its overall improvement.
- * Took ownership and completely integrated the back-end for two new modules into the application.

Training & Certifications

* Gold Medal, a certificate from NPTEL in **Python** (2019).

* Silver Medals, and certificates from NPTEL in **Soft Computing, IoT, Software Project Management**, and **Social Networks** (2019).

Academic Projects

Face/Object Recognition Application:

July 2019 – Nov 2019

Technologies used: Machine Learning API (Clarifai), ReactJS, NodeJS, ExpressJS, RESTful APIs.

- * Developed a web application that used an **ML API (Clarifai)** on **ReactJS** with the support of **NodeJS** for the backend. It also used **ExpressJS** to facilitate **RESTful APIs**.
- * The application would recognize faces and different objects from any given public image link.
- * Led this project and presentation and worked on several test cases before finalizing the application.
- * It was majorly appreciated and was deemed as one of the top 3 projects among 100 projects at the University.
